Development of chemical products for professional use has been business of **SANIT-CHEMIE** since its establishment in 1983. Since that there have been three decades during which we have continuously built our reputation for high quality and steady innovation. The name SANIT stands for very effective optimal products for following application areas:

### Service – Cleanness – Hygiene – Maintenance – Environment

All our products feature the highest standards on quality and efficiency. They are environmentally sound at the same time and help to secure the future of precious natural resources. We tailor our products to particular needs of craftsmen and industry.

Steady advancement and development of new products is our promise to our customers. A team of specialists is constantly working on innovative recipes in our modern laboratories. SANIT products meet all legal restraints and standards at most. They work fast and reliably and solve daily the routine tasks in the perfect way. Responsibility for people and our planet is the basis of all our activities. **SANIT-CHEMIE** prefers using raw materials that do not pose any health hazard and that are 100% environmentally safe. Due to ideal matching of possible applications SANIT products allow our customers to save storage costs. Thank to easy handling and secure application our products provide their users necessary safety without having complicated and time – consuming instructions at hand.

Our employees are at disposal of our partners for all questions and help solving all possible upcoming problems. Our qualified sales staff support our customers also at their locations.

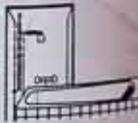

In this way **SANIT-CHEMIE** makes sure that our products guarantee their maximal effect with minimal consumption.

As an owner-managed company **SANIT-CHEMIE** insures a short decision making process that is absolutely necessary for implementation of required innovations and investments in the most rapid and target-oriented way.

Our General Terms and Conditions apply. You will find these on our web page [www.sanit-chemie.de](http://www.sanit-chemie.de)

## ProSanitärReiniger DU100

SANIT ProSanitärReinigerDU100 ist ein sanfter Unterhaltsreiniger für die tägliche Reinigung im gesamten Bad- und Sanitärbereich. Kalk, Urinstein, Fett und Seifenablagerungen werden dank der hohen Reinigungsleistung mühelos entfernt.

SANIT ProSanitärReinigerDU100 reinigt mit seiner milden Wirkstoffkomponenten besonders materialschonend, hinterlässt streifenfreien Glanz und einen angenehm hygienischen Duft. Durch die spezielle Wirkstoffkombination wird die Wiederrückbildung deutlich verzögert.

Säurefeste Oberflächen im gesamten Bad- und Sanitärbereich gut einsprühen.

SANIT ProSanitärReinigerDU100 mit klarem Schwamm oder Bürste auf der zu reinigenden Fläche verteilen, einwirken lassen, dann mit klarem Wasser nachspülen. Auf vertikalen Flächen läuft das Wasser vollständig und rückstandfrei ab. Hochglanzpolierte Flächen eventuell nachwischen.

perfekte  
Toiletten-Hygiene

auch für beschichtete  
WC's geeignet

# SANIT

wcReiniger flüssig

Eine hygienisch saubere Toilette ist mit dem  
SANIT wcReiniger flüssig kein Problem

Die aktive Citruskraft beseitigt schnell und gründlich  
Anlagerungen wie Kalk, Schmutz und Urinreste im  
WC bis unter den Beckenrand. Die Vakuum-  
SANIT wcReiniger flüssig ermöglicht eine  
Einwirkzeit, besonders an senkrechten Oberflächen.  
Dadurch wird eine optimale Reinigungswirkung  
erreicht. Die enthaltenen Wirkstoffe beseitigen schnell  
und unangenehme Gerüche in allen Einmach-  
arten, auch in beschichteten WC's

Die Kraft des SANIT wcReiniger flüssig ist wirkungsvoll

Mit leichtem Druck den Reiniger unter den Rand  
schieben. Einige Minuten einwirken lassen, anschließend  
bei starker Verschmutzung oder zur Grundreinigung  
lassen Sie den SANIT wcReiniger flüssig  
einwirken, danach nachbürsten und abspülen

gewerblichen Einsatz

## SANIT RohrGranate®

SANIT RohrGranate® garantiert eine schnelle und sichere Beseitigung von hartnäckigen Fettablagerungen, Haaren, Zellstoffverbindungen, Hygieneartikeln. Aufgrund seines besonderen Gewichts werden auch tieferliegende Verstopfungen erreicht und aufgelöst. Die SANIT RohrGranate® behält in wenigen Minuten schlecht funktionierende oder verstopfte Abflüsse und greift die Materialien der eingesetzten Rohrleitungen nicht an.

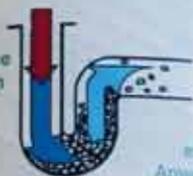

Vor Anwendung überschüssiges Wasser aus dem Abfall entfernen. SANIT RohrGranate® nicht mit anderen Chemikalien einsetzen oder vermischen. SANIT RohrGranate® langsam in den Abfluss gießen (ca. 500 ml) und ca. 5-10 Minuten einwirken lassen. Danach mit kaltem Wasser gründlich nachspülen. Ggf. Vorgang wiederholen.

**Einstellhilfe:** Spezielle Trichter mit weitem Auslauf (z.B. Pulvertrichter) zum Aufsetzen auf Abflüsse in Waschbecken, Spülen oder Duschwannen können Spritzer oder ein „Dampfergeräusch“ verhindern.

**Verstärkter Hinweis:** Bitte nur Abflüsse, die aus unempfindlichen Materialien (z.B. Kunststoff) bestehen, mit diesem Produkt reinigen. Bei empfindlichen Materialien (z.B. Metall) ist eine Vorbehandlung mit einem geeigneten Reiniger erforderlich, um die Oberflächen vor Beschädigung durch das aggressive Reinigungsmittel zu schützen.

Inhalt: 1.000 ml

löst hartnäckige  
Verstopfungen

einfache  
Anwendung

## SANIT RohrBombe®

SANIT RohrBombe® löst hervorragend organische Abfallstoffe wie Fleisch-, Fett-, Gemüse- und Lebensmittelreste insbesondere Haare. Innerhalb von wenigen Minuten werden hartnäckige Verstopfungen aufgelöst. SANIT RohrBombe® entwickelt keine gefährlichen Dämpfe und greift keine Rohrleitungen, Dichtungen oder Faulbehälter an. Einfach anzuwenden und sparsam im Verbrauch.

SANIT RohrBombe® in die verstopfte Rohrleitung gießen und einwirken lassen. Nach einigen Minuten mit reichlich Wasser nachspülen. SANIT RohrBombe® gehört in den Abfall.

**Wichtig:** Bitte nicht in Abflüsse, die aus unempfindlichen Materialien (z.B. Kunststoff) bestehen, mit diesem Produkt reinigen. Bei empfindlichen Materialien (z.B. Metall) ist eine Vorbehandlung mit einem geeigneten Reiniger erforderlich, um die Oberflächen vor Beschädigung durch das aggressive Reinigungsmittel zu schützen.

**Verstärkter Hinweis:** Bitte nur Abflüsse, die aus unempfindlichen Materialien (z.B. Kunststoff) bestehen, mit diesem Produkt reinigen. Bei empfindlichen Materialien (z.B. Metall) ist eine Vorbehandlung mit einem geeigneten Reiniger erforderlich, um die Oberflächen vor Beschädigung durch das aggressive Reinigungsmittel zu schützen.

## WReiniger AISi

SANIT WReiniger AISi ist für die tiefenwirksame Reinigung von Brennkammern und Wärmetauschern aus Aluminium-Silizium konzipiert. Entfernt stärkste Verschmutzungen und Ablagerungen mühelos.

### Anwendung:

Schließen Sie den Heizkessel ab und lassen Sie ihn unter 40 °C abkühlen. Spülen Sie anschließend den Wärmetauscher mit dem SANIT WReiniger AISi säurefrei über ca. 20 Minuten. Anschließend gründlich mit klarem Wasser spülen.

Zur Einspritzung empfehlen wir den **Sanit-Spritzschlauch** (Art-Nr. 8703). Je nach Verschmutzung kann der Vorgang wiederholt werden.

# Descalers

Limescale becomes a significant problem for warm water supply pipes from water temperature of about 40°C, especially if flowing water is hard. In case the hard water is in addition aggressive, limescale and rust deposits result from corrosion process.

# Waterless urinals

Look ahead and using our waterless urinals make your contribution to sustainable and environmentally-friendly handling of our most precious resource – water.

Waterless urinals from **SANIT** are perfect for new construction as well as for refurbishment of older buildings. You will find the right model for every interior.

The centrepiece of the uridan® urinals is the patented uridan® odour trap: This odour trap works with the aid of uriLOCK®, a special blocking fluid. uriLOCK® consists of plant-based substances and is biodegradable. Due to the fact that it is lighter than urine, the heavier urine automatically flows directly down the drain. The lighter uriLOCK® stays on the surface and works like a liquid lid that blocks out all drain and sewage odours.

Why should you choose waterless urinals from **SANIT**?

- easy installation
- only waste water connection is needed
- it is much more hygienic than conventional drain systems
- 100% odour-free guarantee
- no chemicals
- no WC freshener stones are needed
- no electronic parts – no claims
- no electrical connection is needed
- no fresh water connection is needed
- no membrane
- no special component parts are needed
- no urine residue as there is no water
- no plugs
- no bacteria and fungi on surface
- easy cleaning

Scope of delivery includes

- 1 bottle uriLock® blocking fluid 300 ml
- 1 bottle uriCLEAN® cleaning agent 500 ml
- mounting accessories
- 1 piece uriCLOTH® cleaning cloth
- 1 service suction cup

In case of horizontal connection: 1 piece DN50 90° elbow

## Type Admiral

Material: ceramics or glass fibre reinforced plastic material (GRP)  
 Colours: white, granite, stone nero, stone grey, deep black. Ceramic urinals are available in white.

Blocking fluid uriLOCK® must be changed after 15.000 – 20.000 times of use.

Installation: vertical or horizontal connection

### Scope of Delivery

### Art.-No.

1 piece GRP, horizontal connection, white	UAHGW
---	-------

1 piece ceramics, horizontal connection, white	UAHKW
--	-------

*For article numbers of models with vertical connection, other colour versions and other product length please see our price list.*

## SANIT pwclean®

For disinfection of contaminated drinking water supply systems during normal operation of the water system. Certified according to Drinking Water Ordinance. Kills legionellae, E-coli and many other germs. Removes biofilm from pipes and systems. Works in cold and warm water. pH neutral, not corrosive. Is not a dangerous product in terms of transportation.

Packing unit	Art.-No.
5 l canister	PWC05
20 l canister	PWC20
100 l barrel	PWC100

## SANIT pwclean® safe

A product for immediate action when disinfection of a drinking water system during normal operation is required. It reduces load of contamination in water during construction or modification period. It prevents reproduction and carry-over of germs. The product is tested and certified.

Packing unit	Art.-No.
20 l canister	PWCS20
100 l barrel	PWCS100

## SANIT LegioGranate®

A product for shock disinfection of contaminated drinking water systems according to Work Sheet DVGWW291. It is effective against legionellae, E-coli, pseudomonas, viruses and other germs. The solution is pH-neutral and not corrosive when used correctly. It is not a dangerous product in terms of transportation.

Packing unit	Art.-No.
1.000 ml bottle	LEGR01
5 l canister	LEGR05
20 l canister	LEGR20

## SANIT AquaDecon®

Spray disinfection for cleaned or new water tanks. It does not develop any dangerous vapours. Certified according to Drinking Water Ordinance. It is effective against legionellae, E-coli, pseudomonas, viruses and other germs. The solution is pH-neutral and not corrosive. It's not a dangerous product in terms of transportation.

Packing unit	Art.-No.
5 l canister	ADEC05
20 l canister	ADEC20
100 l barrel	ADEC100

## SANIT TrinkwaClean®

For use on drinking water equipment (for example water dispenser, hot drinks makers) during sanitation or maintenance of the equipment. It is effective against legionellae, E-coli, pseudomonas, viruses, faecal streptococcus, fungi and spores. It's not a dangerous product in terms of transportation.

Packing unit	Art.-No.
1.000 ml bottle	TRW01
20 l canister	TRW20

You can purchase technical equipment which is needed for dosing in proportion to quantity of **SANIT-CHEMIE** products for water disinfection from us as well. The range includes contact water meters with impulse output, dosing pumps, storing and dosing tanks. We will prepare a complete package for you based on your individual needs.

# Water treatment

Among other advantages our water disinfection products do not damage equipment and materials. In our range you will find the right product even for disinfection of cooling water in evaporative cooling towers. We provide for secure water in all application areas.

## SANIT LegioPol®

A disinfection product for disinfection and safekeeping of proper function of evaporative cooling towers. Tested and certified according to DIN EN 13623. It is effective against legionellae, E-coli and many other germs. The danger of getting ill through an open cooling water system is reduced.

Packing unit	Art.-No.
5 l canister	LPOL05
20 l canister	LPOL20
100 l barrel	LPOL100
IBC 1.000 l	LPOL1000

## SANIT aquaris® KUR

Provides for safe and ecological function of every process water system, for example spray-irrigation systems, rainfall simulators, drawing wells, fountains, ponds and water tank trucks like water cannons, etc.

Packing unit	Art.-No.
1.000 ml bottle	7284
5 l canister	7285
20 l canister	7286
100 l barrel	7287

## Photometer measuring device

A device for measuring of free chlorine content in water with the help of DPD1 tabs. It is needed to carry out periodic measurements during disinfection process. Packed in a suitcase together with accessories required. The package includes 100 reagents to control free chlorine and total chlorine content each.

Packing unit	Art.-No.
1 device	PPMK
100 pieces of reagents DPD No.1	PTR1

## Legionellae Test Kit

For easy and fast detection of legionellae of serogroup 1. Includes material for 5 tests with accessories. Packed in a practical suitcase.

Packing unit	Art.-No.
5 pieces	PLT

# Water treatment

We offer practical quality products to be installed as an immediate measure in case if taking shower is prohibited through health office. **SANIT-CHEMIE** makes germ-free shower easy. We also offer useful technical devices for fast and repeatable measurements of water quality relevant parameters.

## exact dDip® Bluetooth measuring device

A photometer with universally extendible functions which is operated by a smartphone. For easy and fast measuring of free chlorine and pH value. Recommended for disinfection of drinking water with **SANIT** products. The iDip® app offers lots of other measuring parameters as well.

Packing unit	Art.-No.
1 device	PEM1K
100 measuring tapes DPD1 free chlorine	PEMD

## exact Chlorine Plus measuring device

A photometer for measuring of free chlorine, pH value and other measuring parameters in water. Water-proof. With an integrated measuring cell for exact and repeatable results. Is perfect for use in bathing water as well.

Packing unit	Art.-No.
1 device	PEM2K
100 measuring tapes	PEMP

## SANIT Legionellae filter shower head white/ chrome-plated

A legionellae filter shower head to be used as an immediate protection measure in case of a heavily contaminated drinking water system. Protects users from germs (for example legionellae) when taking a shower. Sets prohibition of taking shower aside. The service life is up to 90 days. The filter cartridge is replaceable. Tested and certified.

Packing unit	Art.-No.
1 piece white	3172
1 piece chrome-plated	3173

## SANIT Legionellae filter sprinkler head

A fully functioning sprinkler head for all big kitchens and sinks. Protects users 100% from germs, bacteria and legionellae. With a replaceable filter cartridge.

Packing unit	Art.-No.
1 piece	PKSP

# Water treatment

**SANIT-CHEMIE** products can be applied at all places where clear water is required. For disinfection of drinking water distribution networks during normal operation of the water system, for disinfection of new-installed water distribution networks, for cleaning and maintenance of water systems as well as for providing of good quality of processing water.
